—PRICE LIST OF CYMBIDIUM PLANTS—
SPRING 1948

As is well known, there is considerable variation in Cymbidiums of the same name, in fact even from the same seed pod. They often vary tremendously in color, form, substance and size. Plants selected for any of these special qualities will, of course, carry a premium price. Accordingly, the prices shown per bulb are the base prices. Flowering size plants usually consist of anything from four bulbs up.

In addition to the varieties on the enclosed list we have a very large assortment of other varieties; many of them are the newest and most up-to-date Cymbidium hybrids available. These we can only sell as they come into bloom in order that the prices may reflect the quality of the individual plants. All those interested in plants of this type should endeavor to visit the nursery when the plants are in bloom which will be from early March until the end of the season.

Flower spikes will be charged at the rate of \$2.50 per spike for varieties having but few flowers and \$5.00 per spike for the many flowering types in addition to the plant price.
Packing is free of charge.

Prices subject to change without notice.

MATURE PLANTS

<u>Variety</u>	<u>Price Per Bulb From</u>
ALEXANDERI (eburneo-Lowianum x insigne Sanderi)	\$ 2.00
ALFXANDERI VAR. DELISE	2.00
